

Overview

Most web interfaces are slow and complex. Enfold Desktop enables users to work with Plone in a familiar Windows desktop environment while extending behaviors such as workflow and rich content types.

Supported

Purchase of Enfold Desktop includes 30 days of installation support.

Organizations can purchase extended support on a six month or yearly basis to ensure prompt response to support issues.

Contents

The following software is contained in the Enfold Desktop package:

- Enfold Desktop client software
- Enfold Desktop components (works on Zope/Plone)

Features

Enfold Desktop creates a Windows Explorer interface into Plone. In your standard desktop environment, you can now add, edit and interact with your Plone server and its content!

- Drag and drop files into Plone through Windows Explorer.
- Cut and paste files into Plone through Windows Explorer.
- Edit files in your local programs (MS Office, Open Office, etc...)
- Lock and unlock documents from Windows Explorer.
- Add any folder to Enfold Desktop via browser integration.
- Move seamlessly between Windows Explorer and your browser.
- Workflow documents from Windows Explorer.
- Check in/out documents.
- Offline editing.
- Alter Dublin core data such as Description straight from Explorer.
- HTTP and HTTPS support.

Feature Comparison Chart
