WE UNDERSTAND NONPROFIT ORGANIZATIONS

Shared knowledge, shared values

SHARING OUR EXPERIENCE

ENFOLD SYSTEMS AND NONPROFIT ORGANIZATIONS

Enfold Systems (Enfold) understands the challenges facing nonprofit groups today. Competition for donations, communicating with a worldwide audience, quickly evolving technologies and budget constraints all combine to present a complex set of issues for any size nonprofit.

Enfold's experienced staff will work with you to address each of these critical challenges to ensure you receive the most value for your money.

Enfold allows you to take advantage of this full-featured, open source system, by providing the software, support and advice you need - all for a fraction of the cost of most proprietary content management systems.

In addition, Enfold enables organizations with limited IT staff and resources to reuse and leverage their existing infrastructure and skills.

Enfold Systems specializes in servicing the content management needs of nonprofit organizations.

With your distinct set of challenges, from streamlining business practices to developing custom applications, Enfold can help you to develop and execute strategies for continued success and growth.

SHARED VALUES

Enfold actively participates in the open-source arena. We share our knowledge and software to benefit a worldwide community.

As key contributors to Plone we invest in, and encourage our clients to release software we develop back to, the community.

Many of our clients enjoy our spirit of giving back, especially nonprofit organizations.

NOTABLE CLIENTS

STRATEGY

"Enfold helped us determine the best technical strategy for hosting / serving our web content. They developed a document highlighting the pros and cons of each of our options, helping us achieve success."

Andrew Hatton, *Oxfam Great Britain*

EFFICIENCY

"We continually had technical problems and were not able to organize or communicate information as well as we needed to. Our new Plone based site allows for information to be posted more quickly and efficiently."

Rita McLennon,
Sargent Shriver National Center on Poverty Law

FUTURE GROWTH

"Enfold Systems provided knowledgeable and focused experts to ensure the success of our new system. Our sites' traffic capacity has increased by 3000% while maintaining the functionality and security we needed."

Frank DiMauro,
UNC Health Care System

CRITICAL PERFORMANCE

"In the course of 10 days during the tsunami crisis, Oxfam America had almost half of its typical yearly visits and almost one-third of its yearly band width. Our public website offered timely, critical content to our users while providing a solid gateway to our online donation system - helping us to raise over $14 million in online gifts."

Nicholas Rabinowitz, *Oxfam America*
